Foreword

The Standard Bidding Documents for Procurement of Non-Consultancy Services have been prepared by the Procurement Policy Unit for use by public entities under the Public Procurement Act, 2015, and are based on the World Bank's Standard Bidding Documents. They are to be used for all services other than consultancy through the Open National Bidding (ONB).

Those wishing to submit comments or suggestions on the Bidding Documents or to obtain additional information on Procurement in Namibia are encouraged to contact:

Introduction

These Standard Bidding Documents are intended as model lump sum types of Contract, which are the most common in Services contracting. Lump sum contracts are used in particular for services which are well defined and are unlikely to change in quantity or specification, and where encountering difficult or unforeseen site conditions are unlikely.¹

Care should be taken to check the relevance of the provisions of the standard document against the requirements of the specific Services to be procured. The following directions should be observed when using the documents:

- (a) All the documents listed in the Table of Contents are normally required for the procurement of Services; however, they should be adapted as necessary to the circumstances of the particular Project.
- (b) Details to be provided by the Employer prior to release of the bidding documents are limited to the Invitation for Bids, Instructions to Bidders (Section I), Bidding Data Sheet (Section II), and Special Conditions of Contract (Section VII), in addition to Sections IV and V, which deal with Activity Schedule, Scope of Service and Performance Specifications respectively. **Specific details** should be furnished in the spaces indicated by italicized notes inside brackets. Those details not filled in by the Employer are the responsibility of the Bidder.
- (c) These Sample Bidding Documents are intended to serve on a repetitive basis. Modifications to address specific Project or Contract needs should be provided only in the Special Conditions of Contract as amendments to the Conditions of Contract. If modifications must be made to the bidding procedures, they can be presented in the Bidding Data Sheet.
- (d) The foot-notes and the notes inside boxes with single borders are not part of the text, but rather contain instructions for the user, as do the Preface and this Introduction section. **They should not be incorporated in the bidding documents.** The cover should be modified as required to identify the bidding documents as to the names of the Project, Procurement Reference, and Employer, in addition to the date of issue.
- (e) The notes inside boxes with double borders should be retained in the issued bidding documents, since these notes provide important guidance to bidders.

¹ Lump sum contracts should be used for Services that can be defined in their full physical and qualitative characteristics before bids are called, or where the risks of substantial design or performance variations are minimal. In lump sum contracts, the concept of priced “activity schedules” has been introduced, to enable payments to be made as “activities” are completed. Payments can also be made on the basis of percentage completion of each activity.

- (f) The standard documents have been prepared for bidding where post-qualification applies; adaptations are necessary to ITB Clause 5 and corresponding Bidding Data Sheet, and Forms when prequalification has taken place. The process of prequalification of bidders is not covered in these standard documents.

Part II – Activity Schedule

Section IV. Activity Schedule

Objectives

The objectives of the Activity Schedule are

- (a) to provide sufficient information on the quantities of Services to be performed to enable bids to be prepared efficiently and accurately; and
- (b) when a Contract has been entered into, to provide a priced Activity Schedule for use in the periodic valuation of Services executed.

In order to attain these objectives, Services should be itemized in the Activity Schedule in sufficient detail to distinguish between the different classes of Services, or between Services of the same nature carried out in different locations or in other circumstances which may give rise to different considerations of cost. Consistent with these requirements, the layout and content of the Activity Schedule should be as simple and brief as possible.

Dayworks Schedule

A Daywork Schedule should be included only if the probability of unforeseen work, outside the items included in the Activity Schedule, is high. To facilitate checking by the Employer of the realism of rates quoted by the bidders, the Daywork Schedule should normally comprise the following:

- (a) A list of the various classes of Services, labour, materials, and Plant for which basic day work rates or prices are to be inserted by the Bidder, together with a statement of the conditions under which the Service Provider will be paid for work executed on a day work basis.
- (b) Nominal quantities for each item of Dayworks, to be priced by each Bidder at Dayworks rates as Bid. The rate to be entered by the Bidder against each basic Dayworks item should include the Service Provider's profit, overheads, supervision, and other charges.

Provisional Sums

The estimated cost of specialized work to be carried out, or of special goods to be supplied, by other Service Providers (refer to Clause 8 of the Conditions of Contract) should be indicated in the relevant part of the Activity Schedule as a particular provisional sum with an appropriate brief description. A separate procurement procedure is normally carried out by the Employer to select such specialized Service Providers. To provide an element of competition among the bidders in respect of any facilities, amenities, attendance, etc., to be provided by the successful Bidder as prime Service Provider for the use and convenience of the specialist contractors, each related provisional sum should be followed by an item in the

Activity Schedule inviting the Bidder to quote a sum for such amenities, facilities, attendance, etc.

Goods and services above will be required from the successful bidder as need arise, and the Electoral Commission of Namibia reserves the right to increase or decrease the quantities of the services.

Section V. Scope of Service and Performance Specifications

(Describe Outputs and Performances, rather than Inputs, wherever possible)

(a) Notes on Specifications

A set of precise and clear specifications is a prerequisite for bidders to respond realistically and competitively to the requirements of the Employer without qualifying or conditioning their bids. The specifications must be drafted to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, and performance of the goods and services to be procured. Only if this is done will the objectives of economy, efficiency, and fairness in procurement be realized, responsiveness of bids be ensured, and the subsequent task of Bid evaluation facilitated. The specifications should require that all goods and materials to be incorporated in the Services be new, unused, of the most recent or current models, and incorporate all recent improvements in design and materials unless provided otherwise in the Contract.

Samples of specifications from previous similar projects in the same country are useful in this respect. Most specifications are normally written specially by the Employer or Project Manager to suit the Contract in hand. There is no standard set of Specifications for universal application in all sectors in all countries, but there are established principles and practices, which are reflected in these documents.

There are considerable advantages in standardizing General Specifications for repetitive Services in recognized public sectors, such as education, health, sanitation, social and urban housing, roads, ports, railways, irrigation, and water supply, in the same country or region where similar conditions prevail. The General Specifications should cover all classes of workmanship, materials, and equipment commonly involved in the provision of Services, although not necessarily to be used in a particular Services Contract. Deletions or addenda should then adapt the General Specifications to the particular Services.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for goods, materials, Services, and workmanship, recognized international standards should be used as much as possible. Where other particular standards are used, whether national standards of the Republic of Namibia or other standards, the specifications should state that goods, materials, Services and workmanship that meet other authoritative standards, and which ensure substantially equal or higher quality than the standards mentioned, will also be acceptable. The following clause may be inserted in the Special Conditions or Specifications.

Sample Clause: Equivalency of Standards and Codes

Wherever reference is made in the Contract to specific standards and codes to be met by the goods and materials to be furnished, and Services or work performed or tested, the provisions of the latest current edition or revision of the relevant standards and codes in effect shall apply, unless otherwise expressly stated in the Contract. Where such standards and codes are national, or relate to a particular country or region, other authoritative standards that ensure a substantially equal or higher quality than the standards and codes specified will be accepted subject to the Project Manager's prior review and written consent. Differences between the standards specified and the proposed alternative standards shall be fully described in writing by the Service Provider and submitted to the Project Manager at least 30 days prior to the date when the Service Provider desires the Project Manager's consent. In the event the Project Manager determines that such proposed deviations do not ensure substantially equal or higher quality, the Service Provider shall comply with the standards specified in the documents.

Part III – Contract

Section VI. General Conditions of Contract

1. This sample contract for the Provision of Services has been prepared for use when hiring firms to provide Services paid on the basis of lump-sum remuneration.

2. Lump-sum contracts are used when definition of the tasks to be performed is clear and unambiguous, when the commercial risk taken by the Service Provider is minimal, and when therefore such Service Provider/s are prepared to perform the assignment for an agreed predetermined lump-sum price. Such price is arrived at on the basis of inputs—including rates—provided by the Service Provider. The Employer agrees to pay the Service Provider according to a schedule of payments linked to the delivery of certain outputs. A major advantage of the lump-sum contract is the simplicity of its administration, the Employer having only to be satisfied with the outputs without monitoring the staff inputs.

3. The Contract includes four parts: the Form of Contract, the General Conditions of Contract, the Special Conditions of Contract, and the Appendices. The Employer using this sample contract should not alter the General Conditions. Any adjustment to meet project features should be made only in the Special Conditions.

These notes are intended only as information for the Employer or the person drafting the bidding documents. They should not be included in the final documents.

5.2 Change in the Applicable Law

If, after the date of this Contract, there is any change in the Applicable Law with respect to taxes and duties which increases or decreases the cost of the Services rendered by the Service Provider, then the remuneration and reimbursable expenses otherwise payable to the Service Provider under this Contract shall be increased or decreased accordingly by agreement between the Parties, and corresponding adjustments shall be made to the amounts referred to in Sub-Clauses 6.2 (a) or (b), as the case may be.

- 6.6 Price Adjustment** 6.6.1 Prices shall be adjusted for fluctuations in the cost of inputs only if **provided for in the SCC**. If so provided, the amounts certified in each payment certificate, after deducting for Advance Payment, shall be adjusted by applying the respective price adjustment factor to the payment amounts due in each currency. A separate formula of the type indicated below applies to each Contract currency:

$$P_c = A_c + B_c \text{ Lmc/Loc} + C_c \text{ Imc/Ioc}$$

Where:

P_c is the adjustment factor for the portion of the Contract Price payable in a specific currency “c”.

A_c , B_c and C_c are coefficients specified in the SCC, representing: A_c the nonadjustable portion; B_c the adjustable portion relative to labor costs and C_c the adjustable portion for other inputs, of the Contract Price payable in that specific currency “c”; and

L_{mc} is the index prevailing at the first day of the month of the corresponding invoice date and L_{oc} is the index prevailing 30 days before Bid opening for labor; both in the specific currency “c”.

I_{mc} is the index prevailing at the first day of the month of the corresponding invoice date and I_{oc} is the index prevailing 30 days before Bid opening for other inputs payable; both in the specific currency “c”.

If a price adjustment factor is applied to payments made in a currency other than the currency of the source of the index for a particular indexed input, a correction factor Z_o/Z_n will be applied to the respective component factor of p_n for the formula of the relevant currency. Z_o is the number of units of currency of the country of the index, equivalent to one unit of the currency payment on the date of the base index, and Z_n is the corresponding number of such currency units on the date of the current index.

6.6.2 If the value of the index is changed after it has been used in a calculation, the calculation shall be corrected and an adjustment made in the next payment certificate. The index value shall be deemed to take account of all changes in cost due to fluctuations in costs.

- (b) stating whether any remuneration payable in respect of work done is due;
- (c) containing such other information as the Chief Executive Officer of the Public Entity administering the contract may require to satisfy himself that the provisions under this clause have been complied with.

6.8.3 Where the Chief Executive Officer of the Public Entity administering the contract is satisfied that remuneration is still due to an employee employed under this contract at the time the claim for payment is filed under subsection 1, he may, unless the remuneration is sooner paid by the Service Provider, arrange for the payment of the remuneration out of the money payable under this contract.
